

BEHIND THE BRAND

NEW STYLE CABINETS

Craftsmanship runs deep for Mike Tracz, founder and president of New Style Cabinets. A third-generation cabinetmaker, he's spent nearly two decades shaping a company that blends heritage with innovation.

Every detail happens in-house — from the first sketch to fabrication, delivery, and installation. That control isn't just about efficiency; it's about setting uncompromising standards and responding to each client's vision. Recently, the team added metalwork to their Chicago shop, giving them even more freedom to experiment and refine. The result? Higher quality, on-time delivery, and designs that surprise in the best way.

Known for tackling complex designs and introducing fresh finishes, New Style creates cabinetry that isn't just beautiful, but built for the way people live today. It's design with staying power, grounded in tradition and reimagined for the future.

New Style opened its Naples showroom in November 2025, a culmination of years of design work across Southwest Florida. The showroom is a destination for inspiration, innovation, and the exceptional craftsmanship synonymous with the brand.
